

Show Grades via Quick Lookup (Teacher)

PowerSchool stores grades and attendance, even after the student is dropped from a class or transfers between schools.

You want to view grades from dropped classes from a student. In your PowerSchool class list, start by clicking the backpack in a course the student is taking.

Find the student you want in the top left course roster. Selecting will open up the student record.

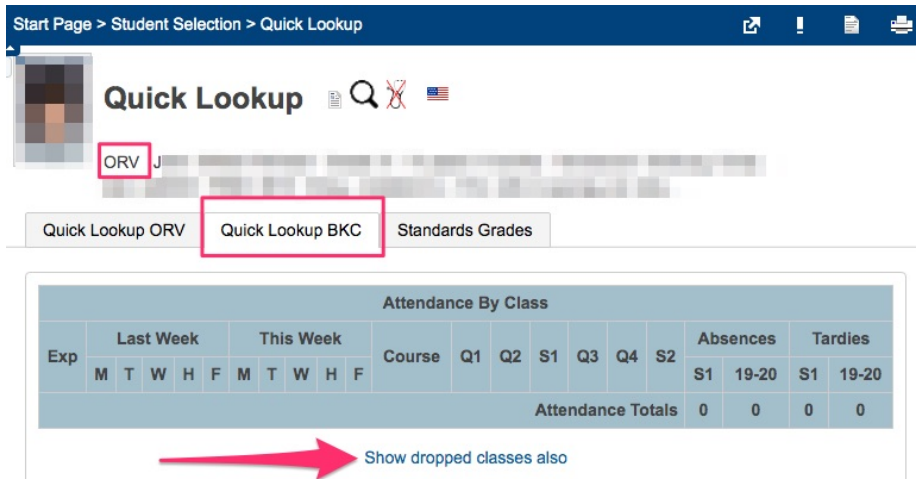

(This example shows the schedule page.)

A dropdown window is available. Click and select "Quick Lookup."

This student is enrolled in ORV, but there is a tab for his previous attendance and grades from BKC.

To see dropped classes, click "Show dropped classes also" at the bottom of the page.
