

Parent Access in PowerSchool

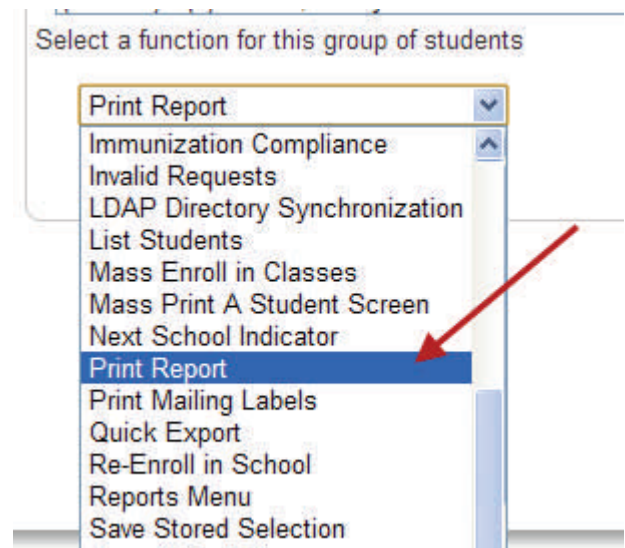

Parents can create an account to view their students grades, attendance, lunch balance, and graduation progress through PowerSchool. Before they can do this they need directions and access codes, there is report in PowerSchool that will give them all this information in one letter.

I would suggest running this report for all students in your school and sending it home so parents have the information they need to create an account.

Select All students at your school by clicking 'All' under brLog into PowerSchool and click 'All' at the Start Page.

Then choose Print Report from the list of functions.

Choose the report 'PS Access for Parent Letter', submit, refresh the report queue until your report is finished.
