

Quick Lookup for Dropped Classes, Classes at Other Sites (Admin)

To view Quick Lookup, select a student in PowerSchool.

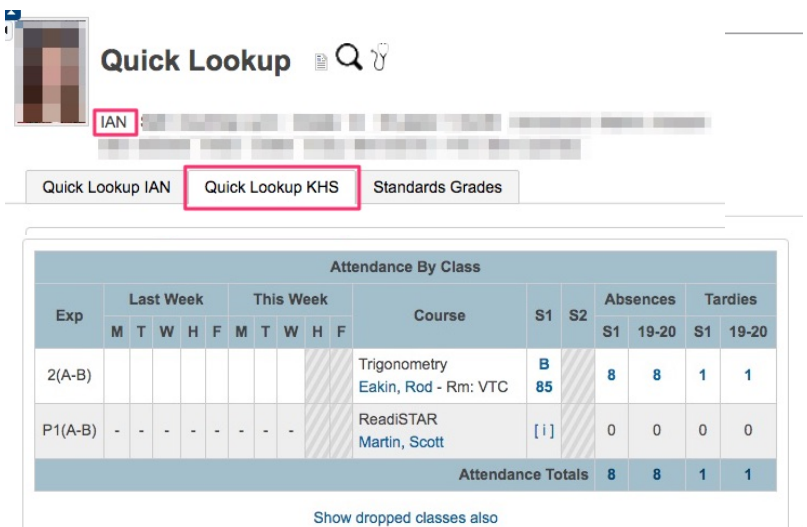

Quick Lookup is a page in PowerSchool where you can get a “Quick Look” at grades and attendance.

Under Quick Lookup, at the bottom of the page, you’ll see a link for *Show dropped classes also*. This can be used for students who have left the district, or students who are still enrolled, but dropped classes during the year.

Sometimes students are enrolled in classes at more than one site, like StarNET VTC courses. You can see those classes by just switching tabs.

This student is enrolled in IAN, but is taking VTC courses that are listed for KHS.
